

Nimantran Premium Plan

Sep 26, 2026 · @rahul keshwala

Summary

Nimantran should launch as a freemium 3D invitation app that charges per event, with a subscription only for planners and businesses. Most families host a wedding once, so a monthly plan feels wrong to them, while planners, studios and printers send invites every week.

The product is a link, not a PDF: guests tap a 3D card that opens, see a live countdown, maps and schedule, and RSVP in one tap. The host sees a live guest list. That combination of wow-factor plus practical guest management is what people will pay for.

- **Start:** Indian weddings, then all Indian occasions, then the global diaspora and other cultures.
- **Earn from:** paid editions per event, add-ons (AI, video, custom domain, printing) and business subscriptions.
- **Cost to serve:** AI and hosting cost roughly ₹2–20 per invite, so margins stay above 90%.

Market and competitors

The market is large and the gap is clear: today's options are either flat videos with no guest tools, or Western RSVP platforms priced in dollars. India alone hosts [around 10 million weddings a year](#), and printed cards cost ₹20–₹50 each, so a 500-guest wedding spends ₹10,000–₹25,000 on paper ([Magical Star](#)).

Option	What you get	Price	Gap Nimantran fills
Canva and similar DIY tools	Basic templates, you design it yourself	Free	No 3D, no RSVP, takes hours
Template video makers	Pre-made animated video, names swapped in	₹200–₹500	A static MP4, no guest list or updates
wishnwed	Video invite from a template, free watermarked preview	From ₹299	Video only, no interactive link

Option	What you get	Price	Gap Nimantran fills
Custom designers	Design built from scratch, image or video	₹900–₹1,200	Slow, no guest tools
Premium agencies	Cinematic multi-scene video, sometimes an RSVP portal	₹3,000–₹15,000	Expensive, days of turnaround
Greenvelope (US)	Animated envelope, RSVP tracking	\$19 (20 guests) to \$499 (1,000 guests); yearly plans \$60–\$755	Dollar pricing, Western designs, few Indian languages

Indian price tiers above come from [Magical Star's 2025 price guide](#).

Positioning: agency-level wow in 60 seconds at template prices, plus the RSVP and guest tools Western apps offer. Target price band: ₹299–₹2,999 per event in India, \$9–\$79 abroad.

Occasions and card types

Weddings come first because they pay the most, but every occasion below reuses the same 3D engine with new templates.

Occasions

Category	Events	Priority
Wedding journey	Roka, engagement, haldi, mehendi, sangeet, wedding, reception, save-the-date	Launch
Family milestones	Birthday, first birthday, anniversary, baby shower (godh bhara), naming ceremony, mundan, retirement	Phase 2
Home and religious	Griha pravesh (housewarming), puja, satyanarayan katha, bhoomi puja, iftar, Christmas, church and gurdwara events	Phase 2
Festivals	Diwali, Eid, Holi, Navratri, Onam, Pongal, Christmas, New Year greetings and party invites	Phase 2 (seasonal spikes)

Category	Events	Priority
Global cultures	Western weddings, quinceañera, bar and bat mitzvah, Chinese weddings, Nikah, graduation	Phase 3
Business	Store openings, product launches, conferences, college fests, corporate parties	Phase 3 (business edition)

Card formats

- **Gate-fold card:** two doors swing open (the current prototype).
- **Envelope:** wax seal breaks, the letter slides out.
- **Scroll:** a royal scroll unrolls, suited to Rajasthani and Mughal themes.
- **Pop-up book:** pages flip and scenes pop up for each function.
- **Photo cube or carousel:** rotating 3D gallery of the couple.
- **Venue walk-through:** a stylised 3D palace, mandap or garden the guest can explore.
- **Multi-event card:** one link with a tab per function, each with its own date, dress code and map.
- **Save-the-date teaser:** a short 5–10 second reveal made for WhatsApp status and Instagram stories.

Template library

Launch with 30 templates across 6 styles, then add 10–15 a month, timed to wedding and festival seasons. Each template is one 3D scene plus swappable colours, fonts, patterns and music, so one scene yields many looks.

Style family	Look	Example templates
Royal heritage	Palaces, jharokhas, gold foil, elephants	Rajasthani Mahal, Mughal Garden, Mysore Durbar
Regional traditional	Motifs from each state's art and wedding customs	Kerala Kasavu, Bengali Alpona, Tamil Kolam, Punjabi Phulkari, Marathi Paithani, Gujarati Bandhani
Faith-based	Sacred symbols and colours	Ganesh Vandana, Nikah Crescent, Anand Karaj, Christian Chapel
Floral and pastel	Soft colours, flowers, watercolour	Marigold Shower, Jasmine Night, Blush Peony

Style family	Look	Example templates
Modern minimal	Clean type, lots of space, subtle motion	Monogram, Line Art, Glass and Gold
Fun and illustrated	Caricatures, cartoon couples, playful scenes	Caricature Couple, Baraat on Wheels, Destination Beach

How templates are organised

- Filter by occasion, region, religion, colour, language and price.
- Every template has a free version with a watermark and a premium version.
- Seasonal collections on the home screen: wedding season (Nov–Feb, Apr–Jun), Diwali, Eid, Christmas.
- "Trending in your city" row using approximate location from the sign-up form.

Customisation levels

1. **Basic:** names, date, venue, message, photo.
2. **Style:** colour theme, fonts, background music, petal or confetti type.
3. **Advanced:** add or remove functions, change animations, upload own artwork, custom 3D objects (premium).

Creator marketplace (Phase 3): independent designers sell templates and keep 50–70% of each sale, which grows the library without hiring.

Languages and regional support

Launch with 10 languages, because families often want the card in their mother tongue and a second copy in English for friends. Each invite can carry two languages, and guests switch with one tap.

Phase	Languages	Scripts needed
Launch	English, Hindi, Marathi, Gujarati, Bengali, Tamil, Telugu, Kannada, Malayalam, Punjabi	Latin, Devanagari, Gujarati, Bengali, Tamil, Telugu, Kannada, Malayalam, Gurmukhi
Phase 2	Urdu, Odia, Assamese, Sindhi, Konkani, Nepali	Nastaliq (right to left), Odia, Assamese
Phase 3 (global)	Arabic, Spanish, French, Portuguese, Indonesian, Chinese, Swahili	Arabic (right to left), Han

What language support includes

- Proper fonts for each script, loaded only when used, so pages stay light on slow networks.
- AI writes invite wording natively in each language, not machine-translated from English.
- Traditional phrases ready to insert: shlokas, "Shubh Vivah", Bismillah, Ik Onkar, Bible verses.
- Right-to-left layouts for Urdu and Arabic.
- App interface translated too, so older relatives can create and RSVP comfortably.
- Dates in local formats, with optional Hindu calendar (tithi) and Islamic (Hijri) dates.
- Local currency and payment methods: UPI in India, cards and wallets abroad.

Features by edition

Four editions keep choices simple: three for families, bought once per event, and one subscription for businesses. Free exists to get people to try the 3D card and share it, which markets the app.

Feature	Free	Premium	Royal	Business
Templates	10 basic	All standard	All, including royal and exclusive	All, plus white-label
Watermark	Yes	No	No	No, own brand
Functions per invite	1	Up to 3	Unlimited	Unlimited
Languages per invite	1	2	2 + wording in each	All
Guests with RSVP	50	500	Unlimited	Unlimited
Live countdown, map, calendar button	Yes	Yes	Yes	Yes
Music	3 tracks	Full library	Full library + own upload	Full library + own upload
Photo gallery	3 photos	20 photos	Unlimited + video clips	Unlimited
AI wording	3 tries	Unlimited	Unlimited	Unlimited

Feature	Free	Premium	Royal	Business
AI couple art	None	2 images	10 images	Per client
WhatsApp teaser video	None	1	All functions	Unlimited
Guest dashboard and reminders	Basic count	Full list, meal choice, plus-ones	Plus seating, travel and stay details	Per client
Link validity	30 days	1 year	Lifetime + memory album	While subscribed
Custom link (nimantran.app/aarav-meera)	No	Yes	Yes + own domain	Yes
Priority support	No	Chat	Personal designer	Account manager

Guest experience features (all editions)

- Opens instantly from WhatsApp on any phone, no app install.
- One-tap RSVP, add to calendar, directions to each venue.
- Dress code and colour theme per function.
- Works on slow 3G with a lighter 2D fallback on old phones.

Host dashboard features (Premium and above)

- Live guest list with who opened, who replied and who hasn't.
- Send reminders and last-minute changes (venue moved, time changed) to all guests at once.
- Import contacts from phone or a spreadsheet.
- Export guest list for caterers and hotels.
- Post-event: guests upload photos to one shared album.

Pricing and subscription model

Charge families once per event and businesses monthly. Let people build and preview the full card free, and pay only to remove the watermark and send, which is the model [wishnwed](#) uses successfully.

Edition	India	International	Who buys
Free	₹0	\$0	Everyone trying it
Premium (per event)	₹499	\$19	Most families
Royal (per event)	₹1,999	\$59	Big weddings, NRI families
Wedding bundle (all functions, Royal)	₹2,999	\$79	Multi-day Indian weddings
Business Starter	₹999/month or ₹9,999/year	\$29/month	Freelance planners, photographers
Business Pro	₹2,999/month or ₹29,999/year	\$79/month	Wedding planners, print shops, venues

Prices are starting proposals to test; launch at these, then adjust after the first 500 sales.

Pricing tactics

- **Regional pricing:** lower prices in lower-income countries using app store price tiers.
- **Festival offers:** Diwali and wedding-season discounts, early-bird save-the-date deals.
- **Upgrade later:** start with Premium and pay the difference for Royal anytime.
- **Referral:** guests who see an invite get ₹100 off their own event; hosts get ₹100 credit per referral.
- **Pay-per-extra:** buy more guests, photos or AI images without upgrading the whole edition.

Business subscription includes: unlimited client invites, own logo and colours, client management, bulk edits, reseller pricing, and a monthly allowance of AI images and videos.

Premium add-ons and upsells

Add-ons can match edition revenue, because families keep spending as the wedding gets closer. Offer them at natural moments: after the card is built, before sending, and after RSVPs come in.

Add-on	What it does	Suggested price (India)
AI couple portrait	Turns couple photos into royal, caricature or watercolour art	₹199 for 5

Add-on	What it does	Suggested price (India)
Cinematic video export	30–60 second MP4 of the 3D card for WhatsApp and Instagram	₹299 per video
AI voice invitation	Family elder's message read aloud in the chosen language	₹199
Wedding website	Full site with story, gallery, schedule and travel info	₹999
Own domain	aaravwedsmeera.com on the invite	₹1,499/year
Printed cards	Matching printed version with a QR code to the 3D card	Commission from print partners
WhatsApp bulk send and reminders	Official WhatsApp Business messages to all guests	Per-message cost plus margin
Seating and travel planner	Table plan, hotel rooms, pickup schedules for guests	₹499
Shagun and gift registry	Guests send money gifts by UPI or pick from a registry	Small fee per gift
Live stream page	Guests abroad watch the ceremony from the invite link	₹499
Memory album	Keep the invite, RSVPs, wishes and photos forever	₹299
Thank-you cards	Matching 3D thank-you sent after the event	₹199
Human designer touch-up	A designer customises the card by hand	₹999 and up

Shagun payments and live streaming involve payment licences and streaming partners, so they belong in Phase 3.

Technical build and costs

A two-to-three person team can launch in about 3 months, because guests only need a web link and the 3D renders free on their own phones. Costs grow mainly with AI images and video exports, and each paid invite covers those many times over.

Tech stack

Layer	Choice	Why
3D invitation	Three.js (as in the prototype)	Runs in any mobile browser, no install
Web app and editor	Next.js or React	Fast pages, good for sharing links and search
Mobile app	Capacitor or React Native wrapper	Same code on Android and iPhone
Backend and database	Supabase or Firebase	Login by phone OTP, guest lists, storage
AI wording	Claude Haiku 4.5 or similar budget model	About ₹1 per invite for wording
AI images	Budget image APIs	Roughly \$0.01–\$0.05 per image
Video export	Server-side render of the 3D scene to MP4	Cost per render, charged as an add-on
Payments	Razorpay (India), Stripe (global)	UPI, cards, wallets
Messaging	WhatsApp Business API, SMS, email	Sending invites and reminders
Hosting	Vercel or Cloudflare	Global fast delivery, free tier to start

Monthly running costs (estimates)

Stage	Invites per month	Hosting and database	AI and video	Total
Launch	500	₹2,000	₹5,000	about ₹7,000
Growing	5,000	₹10,000	₹50,000	about ₹60,000
Scale	50,000	₹60,000	₹4,00,000	about ₹4.6 lakh

At 5,000 invites a month with 20% paying ₹499, revenue is about ₹5 lakh against ₹60,000 in costs, before marketing and salaries.

Build costs

- Team: one full-stack developer, one 3D/front-end developer, one designer for templates (freelance at first).
- Template design: ₹3,000–₹15,000 per premium template if outsourced.

- Legal and setup: company registration, privacy policy, payment gateway approval.
- Marketing: Instagram and YouTube creators, wedding planners, and the free watermarked invites themselves.

Roadmap

Launch weddings in India within 3 months, then move to the next phase only when its gate is met. Each gate is a sales target, so spending grows only after demand is proven.

Nimantran roadmap: four phases, three gates

roadmap · 4 phases, 3 gates

Launch in September or October to catch the November–February wedding season, which is when most invitations are sent.

Risks and next steps

The biggest risk is being copied, so speed, template quality and the guest tools matter more than the 3D effect alone.

Risk	What to do
Competitors add 3D quickly	Build the guest dashboard, languages and reminders, which are harder to copy than visuals
Old phones struggle with 3D	Automatic lighter 2D version on slow or old devices
Families prefer free WhatsApp images	Generous free edition with watermark; the watermark itself spreads the brand
Seasonal sales (wedding months)	Festival, birthday and business invites fill the quiet months

Risk	What to do
AI images of real people misused	Use only photos the host uploads, add content checks
Guest data privacy	Clear consent, data kept only as long as the invite is live, follow India's data protection rules

Next steps

- ☐ Show the prototype to 20 couples and families and ask what they would pay
- ☐ Pick the first 30 templates and brief a designer
- ☐ Build the host editor, share link and RSVP dashboard
- ☐ Set up Razorpay and phone OTP login
- ☐ Partner with 5 wedding planners for early feedback and word of mouth
- ☐ Launch before the November wedding season
